Category:			**Estimated time:**	0:00 hour
Target version:			**Spent time:**	0:00 hour
Deployed In:	Dev Envrionment		**Category:**	UI

Description

We need to implement language translation across the following pages:
All Lookups pages

Steps to Follow:
Create JSON Language Files:

Develop JSON files for each supported language.
Define keys for all text elements on the pages mentioned.
Implement Translation in HTML Files:

Replace static text in the HTML files with the corresponding translation keys from the JSON files.
Update TypeScript (TS) Files:

Ensure that the logic in the TS files retrieves the correct translations based on the user's selected language.
