Service Desk - Feature #1343

Language Translation Implementation in total application

26/09/2024 01:05 PM - Surender Billa

Status:	Resolved		**Start date:**	24/09/2024
Priority:	Low		**Due date:**	27/09/2024
Assignee:	Surender Billa		**% Done:**	0%
Category:			**Estimated time:**	0:00 hour
Target version:			**Spent time:**	0:00 hour
Deployed In:	Dev Envrionment		**Category:**	UI

Description

Task Overview:
We need to implement language translation across the following pages:
Login,
Dashboard,
Newtickets,
Mytickets,
Change-password,
Create-User,
Support,
Reports,
User-Manual,
Change-Password,

Steps to Follow:

1. Create JSON Language Files:
Develop JSON files for each supported language.
Define keys for all text elements on the pages mentioned.

2. Implement Translation in HTML Files:
Replace static text in the HTML files with the corresponding translation keys from the JSON files.

3. Update TypeScript (TS) Files:
Ensure that the logic in the TS files retrieves the correct translations based on the user's selected language.
