Description

Cascase updates not happening for referenced tables with Side column in it. This is noticed in link Split case. Merge cases should also be verified.

In the example I've taken, I split the link of SH008A at 26760 and created new link as RSHA section is start from here. It has updated all data tables but at some corner cases like the ones shown in the attached screenshot("Split_Rgh.png","Split_Drain.png","split_ShoulderWidth.png","split_ShoulderType.png","Split_LandUse.png"), it did not split the rows. In other cases it worked.
