AVS SP modifications

21/03/2025 03:44 PM - Venkata Suryateja Thripuraribhotla

Status:	New	Start date:	12/03/2025
Priority:	High	Due date:	
Assignee:	Venkata Suryateja Thripuraribhotla	% Done:	0%
Category:		Estimated time:	0:00 hour
Target version:		Spent time:	0:00 hour
Deployed In:	Demo Environment	Category:	Database
Description			
As per the updated modifications in AVS base input table structures (like Road Inventory, Culverts, Furniture data) we need to modify the SP's for AVS processing in the application.			

History

#1 - 21/03/2025 03:46 PM - Venkata Suryateja Thripuraribhotla

Initial modifications done to the SP's and testing has been done for East province data. All the attributes are successful with valuation but Road furniture data sp is having error in valuation because of changes in Lookup codes for furniture items shared by RDA during recent modifications done in September 2024.

#2 - 21/03/2025 03:48 PM - Venkata Suryateja Thripuraribhotla

Furniture data SP has also been modified but there is still error in code conversion to int data type of the condition column in furniture data items. Not sure from which furniture item the error is generated. Need to verify all the furniture attributes.
