Description

Sensitive Information Disclosure (Repeated)
observation : Repeated
CWE : CEW-200
Description :
Information disclosure, also known as information leakage, is when a website unintentionally reveals sensitive information to its users. Depending on the context, websites may leak all kinds of information to a potential attacker, including: (a) Data about other users, such as usernames or financial information (b) Sensitive commercial or business data (c) Technical details about the website and its infrastructure
Affected Path(s) :
https://his-patient-management-service.satragroup.in/patientById/45 *-Applicable to entire application
Impact :
The dangers of leaking sensitive user or business data are fairly obvious, but disclosing technical information can sometimes be just as serious. Although some of this information will be of limited use, it can potentially be a starting point for exposing an additional attack surface, which may contain other interesting vulnerabilities.
Evidence/Proof Of Concept :
Step 1: Access the URL "https://his-patient-managementservice.satragroup.in/patientById/45" and it was observed that sensitive information like
"Aadhar numbers" were disclosed in Plain text as shown in below screenshot.
clipboard-202405011246-a5qhl.png

Recommendation :
It is recommended not to disclose any sensitive information to the end user. Incase of aadhaar: It is recommended to use Aadhaar vault service to store aadhaar numbers securely as per UIDAI guidelines. Mask Aadhaar numbers and display only last 4 digits.

History

#1 - 03/05/2024 04:24 AM - Harish Beechani

- Assignee set to Vasu Malladi

#2 - 03/05/2024 04:24 AM - Harish Beechani

- Status changed from New to In Progress

#3 - 03/05/2024 05:27 AM - Sivakanth Kesiraju

- Target version set to Security Audit

#4 - 10/05/2024 07:16 AM - Harish Beechani

- Status changed from In Progress to Resolved
